Ciclo de Coloquios 2019

El Departamento de Informática de la Universidad Técnica Federico Santa María tiene el agrado de invitar a la comunidad Universitaria a su ciclo de coloquios. Esta presentación se realizará en el Auditorio Claudio Matamoros (F-106), en la Casa Central el día **miércoles 15 de enero las 12:00**.

Título
User experience in Innovation platforms

Expositor
Marco Bonfigli
Software developer.

Mini Bio
Marco is a software developer with several years of experience building applications, focusing on back-end, integration but always considering the end user point of view. I took part in many projects in multiple sectors, e.g. banking, telco, engineering, and also gave my contribution by coordinating some of them.
My most relevant skills have been shaped by years on coding in Open Source languages and frameworks: Java, PHP, SQL, HTML, thus giving me the capability to understand all the layers an application is made of.
I always try to get a general overview of an application architecture to understand the opportunities to improve it. I also took part in FP7 and H2020 European project, both developing and coordinating them.

Resumen
Innovation platforms have multiple heterogeneous data sources and different kinds of users. The challenge building a good platform is to shape it in a way that allows users to find and share information, and to collaborate with each other in a friendly space.

Lugar y Fecha
15 de enero de 2018, 12:00 hrs
Sala de Reuniones, Casa Central, UTFSM.
